Presentation Generator

Generate slides from React components. A complete guide to this repo.

Swipe for more →

What Is This?

A React PDF presentation generator for LinkedIn carousels, course materials, and more.

Write TSX components, get PDF/PNG slides.

Page Wrappers

- HeaderFooter - standard slide layout with header and swipe footer
- TwoRectangles - two-column layout with colored side panel
- HandWrittenNoteSlide - flexible card with icon, title, subtitle, and note

Content Components

📝 BulletsList - icons or emojis with text

✅ ItemRow - check/x rows for comparisons

🖼️ ContentImage - responsive image display

📖 ContentText - title and description variants

TwoRectangles

This slide uses the TwoRectangles page wrapper with ContentText components inside.

Alternating colors between slides creates a smooth transition effect in carousels.

See note on code to a demo

Images from URL

Pass a URL directly to ContentImage

Local Images

Use path.resolve(__dirname, ...) for local files

HandWrittenNoteSlide

A flexible layout with icon, title, subtitle, and note

Card Content

This is a handwritten-style note!

ItemRow

Perfect for do's and don'ts

- ✓ Compose slides with reusable components
- ✓ Use HeaderFooter or TwoRectangles wrappers
- ✓ Customize colors, fonts, and icons via props
- ✗ Hardcode styles across every slide
- ✗ Skip registerFonts() at the top

Your Signature

Edit signatureDefault.ts to set your identity

- author - your name displayed on every slide
- role - your tagline or description
- avatarSrc - URL or absolute path to your photo

All header and signature components use these defaults automatically

Generating Output

- Configure buildPdfConfig.json with source and destiny paths
- Run "npm run build-pdf" to generate your PDF
- Run "npm run watch" to auto-regenerate on changes

Add "destiniy-image" to config for PNG export

MCP Integrations

This project works best paired with MCP servers:

- Buffer MCP - schedule and publish carousels directly to LinkedIn
- Cloudinary MCP - upload and manage slide images in the cloud
